No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Pred. Determination of this BAC-end sequence was carried out as part of a collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk -. This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton project grant are pavan. It has been constructed in the vector
                                                                                                                                                                                                                                                                                                                                                                                                                                                                           66 TCTATCTAAAGAAGAAGCACTTTCCCCAATTACAAAACCTAAATACCCCCAGTCAACAAGAA
